Contents

1 Course Introduction

Lesson Agenda	1-2
Instructor and Class Participants	1-3
Training Site Information	1-4
Course Audience	1-5
Course Prerequisites	1-6
Course Goal	1-7
Course Objectives	1-8
Course Methodology	1-11
Course Materials	1-12
Course Agenda	1-13
Summary	1-18

2 Repository Basics

Objectives	2-2
Oracle BI Server Architecture	2-3
Oracle BI Presentation Services	2-5
Oracle BI Server	2-6
Data Sources	2-7
Oracle BI Repository	2-8
Oracle BI Client Installer	2-9
Oracle BI Administration Tool	2-10
Physical Layer	2-11
Objects in the Physical Layer	2-12
Business Model and Mapping Layer	2-13
Objects in the Business Model and Mapping Layer	2-14
Business Model Mappings	2-15
Measures	2-16
Presentation Layer	2-17
Presentation Layer Mappings	2-18
Presentation Layer Defines the User Interface	2-19
Repository Directory	2-20
Repository Modes	2-21
Uploading a Repository	2-22
Reloading Server Metadata	2-23

Sample Analysis Processing 2-24
Uploading a Repository to BI Cloud Services 2-25
Summary 2-26
Practice 2-1 Overview: Exploring an Oracle BI Repository 2-27
Quiz 2-29

3 Building the Physical Layer of a Repository

Objectives 3-2
Physical Layer 3-3
Physical Layer Objects 3-4
Database Object 3-5
Database Object: General Properties 3-6
Database Object: Features 3-7
Connection Pool 3-9
Schema Folder 3-10
Physical Table 3-11
Physical Table Properties 3-12
Physical Column 3-13
Key Column 3-14
Physical Table: Alias 3-15
Joins 3-16
Sample Apps Scenario 3-17
Implementation Steps 3-18
Create a New Repository File 3-19
Provide Repository Information 3-20
Select the Data Source 3-21
Select Metadata Types for Import 3-22
Select Metadata Objects for Import 3-23
Verify and Edit Connection Pool Properties 3-24
Verify Objects for Import 3-25
Verify the Import in the Physical Layer 3-26
Verify Connectivity 3-27
Create Alias Tables 3-28
Define Keys and Joins 3-29
Define Keys by Using the Physical Table Properties Dialog Box 3-30
Open the Physical Diagram 3-31
Define Foreign Key Joins 3-32
Use the Joins Manager 3-34
Print the Physical Diagram 3-35
Design Tips for the Physical Layer 3-36
Summary 3-37

Practice 3-1 Overview: Sample Apps Business Scenario 3-38
Practice 3-2 Overview: Creating a Repository and Importing a Data Source 3-39
Practice 3-3 Overview: Creating Alias Tables 3-40
Practice 3-4 Overview: Defining Keys and Joins 3-41
Quiz 3-43

4 Building the Business Model and Mapping Layer of a Repository

Objectives 4-2
Business Model and Mapping (BMM) Layer 4-3
Objects in the Business Model and Mapping Layer 4-4
Business Model Mappings 4-5
Objects in the Business Model and Mapping Layer 4-7
Business Model 4-8
Logical Tables 4-9
Logical Table Sources 4-10
Logical Table Source: Column Mappings 4-11
Logical Columns 4-12
Logical Primary Keys 4-13
Logical Joins 4-14
Measures 4-15
BISAMPLE Example 4-16
Implementation Steps 4-17
1. Create the Logical Business Model 4-18
2. Create the Logical Tables and Columns 4-19
3. Define the Logical Joins 4-20
4. Modify the Logical Tables and Columns 4-21
5. Define the Measures 4-22
Printing the Business Model Diagram 4-23
Design Tips 4-24
Summary 4-25
Practice 4-1 Overview: Creating the Business Model 4-26
Practice 4-2 Overview: Creating Simple Measures 4-27
Quiz 4-29

5 Building the Presentation Layer of a Repository

Objectives 5-2
Presentation Layer 5-3
Subject Areas 5-4
Presentation Tables 5-5
Presentation Columns 5-6
Presentation Layer Mappings 5-7

Defining the User Interface in the Presentation Layer	5-8
Nesting Presentation Tables	5-9
Aliases	5-10
Controlling Presentation Layer Object Visibility	5-11
BISAMPLE Example	5-12
Implementation Steps	5-13
1. Create a New Subject Area	5-14
2. Edit Presentation Layer Names	5-15
3. Reorder Tables	5-16
4. Delete Columns	5-17
5. Rename Columns	5-18
6. Reorder Columns	5-19
Considerations	5-20
Design Tips	5-21
Summary	5-22
Practice 5-1 Overview: Creating the Presentation Layer	5-23
Quiz	5-25

6 Testing and Validating a Repository

Objectives	6-2
Validating a Repository	6-3
BISAMPLE Example	6-4
Consistency Check	6-5
Checking Consistency	6-6
Consistency Check Manager	6-7
Using the validatepd Utility to Check Repository Consistency	6-8
Marking a Business Model Available for Queries	6-9
Confirming a Consistent Repository	6-10
Uploading a Repository	6-11
Query Logging	6-12
Setting a Logging Level	6-13
Logging Levels	6-14
Validating by Using the Analysis Editor	6-15
Inspecting the Query Log	6-16
Using Session Monitor to Inspect the Query Log	6-17
Using nqlogviewer to Inspect the Query Log	6-18
Opening obis1-query.log to Inspect the Query Log	6-19
Oracle BI SELECT Statement: Syntax	6-20
Oracle BI SELECT Statement Compared with Standard SQL	6-21
Summary	6-22

Practice 6-1 Overview: Testing the Repository 6-23

Quiz 6-25

7 Managing Logical Table Sources

Objectives 7-2

Table Structures 7-3

Business Challenge 7-4

Business Solution 7-5

BISAMPLE Example: Adding Multiple Sources to a Logical Table Source (LTS) 7-6

Importing Additional Dimension Tables 7-7

1. Import Additional Tables 7-8

2. Create Aliases 7-9

3. Define Keys and Joins 7-10

4. Identify Physical Columns for Mappings 7-11

Adding a New Mapping to an Existing Logical Table Source 7-12

1. Create a New Logical Column 7-13

2. Map a New Physical Source 7-14

3. Create the Column Mapping 7-15

Adding a New Mapping to an Existing Logical Table Source: Result 7-16

Adding a New Logical Table Source 7-19

1. Identify a Table that Stores Additional Information 7-20

2. Add a New Logical Table Source 7-21

3. Rename the New Logical Table Source 7-22

4. Verify Column Mappings 7-23

5. Rename the Logical Columns 7-24

6. Add the Columns to the Presentation layer 7-25

7. Verify Your Work 7-26

Modeling for OLTP Systems 7-27

Summary 7-28

Practice 7-1 Overview: Importing Additional Dimension Tables 7-29

Practice 7-2 Overview: Adding a New Mapping to an Existing Logical
Table Source 7-30

Practice 7-3 Overview: Adding a New Logical Table Source 7-31

Quiz 7-33

8 Adding Calculations to a Fact

Objectives 8-2

Business Problem 8-3

Business Solution 8-4

Creating Calculation Measures by Using Existing Logical Columns 8-5

1. Create a New Logical Column 8-6

2. Specify Logical Columns as the Source	8-7
3. Build a Formula	8-8
Creating Calculation Measures by Using Physical Columns	8-9
1. Create a New Logical Column	8-10
2. Map the New Column	8-11
3. Build the Formula	8-12
4. Specify an Aggregation Rule	8-13
Steps for Using the Calculation Wizard	8-14
1. Open the Calculation Wizard	8-15
2. Choose the Columns for Comparison	8-16
3. Select the Calculations	8-17
4. Confirm the Calculation Measures	8-18
5. New Calculation Measures Are Added	8-19
Adding New Measures to the Presentation Layer	8-20
Examining a Query by Using Logical Columns	8-21
Example: Using Logical Columns	8-22
Examining a Query by Using Physical Columns	8-23
Example: Using Physical Columns	8-24
Examining a Query by Using the Calculation Wizard	8-26
Using Functions to Create Expressions	8-27
Summary	8-28
Practice 8-1 Overview: Creating Calculation Measures	8-29
Practice 8-2 Overview: Creating Calculation Measures by Using the Calculation Wizard	8-30
Practice 8-3 Overview: Creating a RANK Measure	8-31
Practice 8-4 Overview: Testing and Validating the Repository Measures	8-32
Quiz	8-34

9 Working with Logical Dimensions

Objectives	9-2
Logical Dimensions	9-3
Logical Dimensions: Types	9-4
Level-Based Measures	9-5
Share Measures	9-6
Logical Dimension: Example	9-7
BISAMPLE Example	9-8
Creating a Level-Based Logical Dimension	9-9
1. Create a Logical Dimension Object	9-10
2. Add a Parent-Level Object	9-11
3. Add Child-Level Objects	9-12
4. Specify Level Columns	9-13

5. Create Level Keys	9-15
6. Set the Preferred Drill Path	9-16
7. Create Level-Based Measures	9-17
8. Create Additional Level-Based Measures	9-19
9. Create Share Measures	9-20
10. Add Measures to the Presentation Layer	9-21
11. Create Presentation Hierarchies	9-22
12. Test Measures and Hierarchies	9-23
Summary	9-24
Practice 9-1 Overview: Creating Logical Dimension Hierarchies	9-25
Practice 9-2 Overview: Creating Level-Based Measures	9-26
Practice 9-3 Overview: Creating Share Measures	9-27
Practice 9-4 Overview: Creating Dimension-Specific Aggregation Rules	9-28
Practice 9-5 Overview: Creating Presentation Hierarchies	9-29
Quiz	9-31

10 Working with Logical Dimension Hierarchies

Objectives	10-2
More Logical Dimensions Types	10-3
Parent-Child Logical Dimensions	10-4
Parent-Child Hierarchy: Example	10-5
Parent-Child Logical Table	10-6
Parent-Child Relationship Table	10-7
Creating a Parent-Child Logical Dimension	10-8
1. Create a Logical Dimension Object	10-9
2. Set the Member Key	10-10
3. Set the Parent Column	10-11
4. Open the Parent-Child Relationship Table Settings Dialog Box	10-12
5. Enter Parent-Child Relationship Table Script Information	10-13
6. Enter Parent-Child Relationship Table Details	10-14
7. Preview Scripts	10-15
8. Confirm Parent-Child Relationship Table Settings	10-16
9. Confirm Changes to the BMM Layer	10-17
10. Confirm Changes to the Physical Layer	10-18
11. Modify the Physical Layer	10-19
12. Modify the BMM Layer	10-20
13. Create the Presentation Hierarchy	10-21
14. Verify Your Work	10-22
Ragged and Skipped-Level Dimensions	10-23
Creating Ragged and Skipped-Level Dimensions	10-24
Summary	10-25

Practice 10-1 Overview: Creating Parent-Child Hierarchies 10-26
Practice 10-2 Overview: Creating Logical Dimensions with Ragged and
Skipped-Level Hierarchies 10-27
Quiz 10-29

11 Managing Usage Tracking

Objectives 11-2
Business Challenges 11-3
Business Solution: Oracle BI Usage Tracking 11-4
BISAMPLE Example 11-5
Steps to Enable Usage Tracking 11-6
1. Create the Usage-Tracking Tables 11-7
2. Import the Usage-Tracking Table 11-8
3. Build a Usage-Tracking Business Model 11-9
4. Stop Oracle BI Components 11-10
5. Set Direct Insertion Parameters in NQSCONFIG.INI 11-11
6. Start Oracle BI Components 11-12
7. Test the Results 11-13
Analyzing Usage-Tracking Data 11-14
Summary 11-15
Practice 11-1 Overview: Setting Up Usage Tracking 11-16
Quiz 11-18

12 Using Model Checker and Aggregates

Objectives 12-2
Business Challenge 12-3
Business Solution: Aggregate Tables 12-4
Model Check Manager 12-5
Model Check Manager Dialog Box 12-7
Oracle BI Aggregate Navigation 12-8
Aggregated Facts 12-9
Modeling Aggregates 12-10
BISAMPLE Example 12-11
Steps to Implement Aggregate Navigation 12-12
1. Import Tables and Create Aliases 12-13
2. Create Joins 12-14
3. Create the Fact Logical Table Source and Mappings 12-15
4. Specify the Fact Aggregation Content 12-16
5. Specify Content for the Fact Detail Source 12-17
6. Create the Dimension Logical Table Source and Mappings 12-18
7. Specify the Dimension Aggregation Content 12-19

8. Specify Content for the Dimension Detail Source	12-20
9. Test Results for Levels Stored in Aggregates	12-21
10. Test Results for Data That Is Above or Below Levels	12-22
Aggregate Persistence Wizard	12-23
Model Checker	12-24
Aggregate Persistence Wizard: Steps	12-25
Aggregate Persistence Wizard Steps	12-26
1. Open the Aggregate Persistence Wizard	12-27
2. Specify a File Name and Location	12-28
3. Select the Business Model and Measures	12-29
4. Select Dimensions and Levels	12-30
5. Select the Connection Pool, Container, and Name	12-31
6. Review the Aggregate Definition	12-32
7. View the Complete Aggregate Script	12-33
8. Verify that the Script was Created	12-34
9. Run the Aggregate Persistence Script	12-35
10. Verify Aggregates in the Physical Layer	12-36
11. Verify That Aggregates Are Populated	12-37
12. Verify Aggregates in the BMM Layer	12-38
13. Test Results for Levels Stored in Aggregates	12-39
Setting the Number of Elements	12-40
Enable Aggregates	12-42
Generate Fragmented Aggregates in Aggregate Persistence	12-43
Troubleshooting Aggregate Navigation	12-44
Considerations	12-45
Summary	12-46
Practice 12-1 Overview: Using Aggregate Tables	12-47
Practice 12-2 Overview: Using the Aggregate Persistence Wizard	12-48
Quiz	12-50

13 Using Partitions and Fragments

Objectives	13-2
Business Challenge	13-3
Business Solution: Oracle BI Server	13-4
Partition	13-5
Partitioning by Fact	13-6
Partitioning by Value	13-7
Partitioning by Level	13-8
Complex Partitioning	13-9
BISAMPLE Example: Value-Based (Order Date)	13-10
Implementation Steps	13-11

Specify Fragmentation Content 13-12
Summary 13-13
Practice 13-1 Overview: Modeling a Value-Based Partition 13-14
Quiz 13-16

14 Using Repository Variables

Objectives 14-2
Variables 14-3
Variable Manager 14-4
Types of Variables 14-5
Repository Variables 14-6
Static Repository Variables 14-7
Dynamic Repository Variables 14-8
Session Variables 14-9
System Session Variables 14-10
Nonsystem Session Variables 14-11
Initialization Blocks 14-13
Initialization Block: Example 14-14
Initialization Block Example: Edit Data Source 14-15
Initialization Block Example: Edit Data Target 14-16
BISAMPLE Example 14-17
Implementation Steps 14-18
1. Create a Dedicated Connection Pool 14-19
2. Open the Variable Manager 14-20
3. Create an Initialization Block 14-21
4. Edit the Data Source 14-22
5. Edit the Data Target 14-23
6. Test the Initialization Block Query 14-24
7. Use the Variable to Determine Content 14-25
8. Verify Your Work 14-26
Summary 14-27
Practice 14-1 Overview: Creating Dynamic Repository Variables 14-28
Practice 14-2 Overview: Using Dynamic Repository Variables as Filters 14-29
Quiz 14-31

15 Modeling Time Series Data

Objectives 15-2
Time Comparisons 15-3
Business Challenge: Time Comparisons 15-4
Oracle BI Solution: Model Time Comparisons 15-5
Time Dimensions 15-6

Time Series Functions 15-7
Time Series Grains 15-8
BISAMPLE Example 15-10
Steps to Model Time Series Data 15-11
1. Identify a Time Dimension and Chronological Keys 15-12
2. Create a Measure by Using the AGO Function 15-13
3. Use a Column with the AGO Function to Create Additional Measures 15-14
4. Create a Measure by Using the TODATE Function 15-15
5. Create a Measure by Using the PERIODROLLING Function 15-16
6. Add New Measures to the Presentation Layer 15-17
7. Test the Results 15-18
Summary 15-19
Practice 15-1 Overview: Creating Time Series Calculation Measures 15-20
Quiz 15-22

16 Modeling Many-to-Many Relationships

Objective 16-2
Business Challenge and Solution 16-3
Bridge Table 16-4
BISAMPLE Example 16-5
Steps to Model a Bridge Table 16-6
1. Import Tables 16-7
2. Create the Physical Model 16-8
3. Create the Logical Model 16-9
4. Map the Bridge Table for Dimensions 16-10
5. Map the Bridge Table for Fact 16-11
6. Create a Calculation Measure 16-12
7. Map Objects to the Presentation Layer 16-13
8. Verify the Results 16-14
Summary 16-15
Practice 16-1 Overview: Modeling a Bridge Table 16-16
Quiz 16-18

17 Setting an Implicit Fact Column

Objectives 17-2
Business Challenge: Dimension-Only Queries 17-3
Business Solution: Implicit Fact Column 17-4
BISAMPLE Example 17-5
Steps to Configure an Implicit Fact Column 17-6
1. Set an Implicit Fact Column 17-7
2. Verify the Results 17-8

3. Clear the Implicit Fact Column 17-9
Summary 17-10
Practice 17-1 Overview: Setting an Implicit Fact Column 17-11
Quiz 17-13

18 Importing Metadata from Multidimensional Data Sources

Objective 18-2
Overview 18-3
Multidimensional Versus Relational Data Sources 18-4
Overview: Importing Multidimensional Data Sources 18-5
BISAMPLE Example 18-7
Creating a Multidimensional Business Model 18-8
1. Import Metadata 18-9
2. Verify the Import 18-10
3. Choose Options to Control the Model 18-11
4. View Members and Update the Member Count 18-12
5. Determine the Member Display Value 18-13
6. Create the Business Model 18-14
7. Create the Presentation Layer 18-15
8. Verify the Results 18-16
Horizontal Federation 18-17
Vertical Federation: Viewing in Reports 18-18
Vertical Federation in BMM Layer 18-19
Summary 18-20
Practice 18-1 Overview: Importing a Multidimensional Data Source into a Repository 18-21
Practice 18-2 Overview: Incorporating Horizontal Federation into a Business Model 18-22
Practice 18-3 Overview: Incorporating Vertical Federation into a Business Model 18-23
Practice 18-4 Overview: Adding Essbase Measures to a Relational Model 18-24
Quiz 18-26

19 Security

Objectives 19-2
Business Challenge: Security Strategy 19-3
Business Solution: Oracle BI Security 19-4
Managing Oracle BI Security 19-5
Oracle BI Default Security Model 19-6
Default Security Realm 19-7
Default Authentication Providers 19-8

Default Users	19-9
Default Groups	19-10
Default Application Roles	19-11
Default Application Policies	19-13
Default Presentation Services Privileges	19-14
Default Application Role Hierarchy: Example	19-15
BISAMPLE Example	19-16
Create Groups	19-17
Create Group Hierarchies	19-18
Create Users	19-19
Assign Users to Groups	19-20
Create Application Roles	19-21
Map Application Roles	19-22
Application Role Hierarchies	19-23
Verify Security Settings in Oracle BI	19-24
Verify Security Settings in the Repository	19-26
Set Up Object Permissions	19-27
Set Up Object Permissions and Verify	19-28
Permission Inheritance	19-29
Permission Inheritance: Example	19-30
Set Row-Level Security (Data Filters)	19-31
Set Query Limits	19-32
Set Timing Restrictions	19-33
Summary	19-34
Practice 19-1 Overview: Exploring Default Security Settings	19-35
Practice 19-2 Overview: Creating Users and Groups	19-36
Practice 19-3 Overview: Creating Application Roles	19-37
Practice 19-4 Overview: Setting Up Object Permissions	19-38
Practice 19-5 Overview: Setting Row-Level Security (Data Filters)	19-39
Practice 19-6 Overview: Setting Query Limits and Timing Restrictions	19-40
Quiz	19-42

20 Cache Management

Objective	20-2
Business Challenge	20-3
Business Solution: Oracle BI Server Query Cache	20-4
Advantages of Caching	20-5
Costs of Caching	20-6
Query Cache: Architecture	20-8
Monitoring and Managing the Cache	20-9
Cache Management Techniques	20-10

Using Fusion Middleware Control to Configure Caching	20-11
Using NQSConfig.ini to Manually Edit Cache Parameters	20-12
Setting Caching and Cache Persistence for Tables	20-13
Using the Cache Manager	20-14
Inspecting SQL for Cache Entries	20-15
Modifying the Cache Manager Column Display	20-16
Inspecting Cache Reports	20-17
Purging Cache Entries Manually Using the Cache Manager	20-18
Purging Cache Entries Automatically	20-19
Using Event Polling Tables	20-20
Seeding the Cache	20-21
Cache Hit Conditions	20-22
Summary	20-23
Practice 20-1 Overview: Enabling Query Caching	20-24
Practice 20-2 Overview: Modifying Cache Parameters	20-25
Practice 20-3 Overview: Seeding the Cache	20-26
Quiz	20-28

21 Setting Up and Using the Multiuser Development Environment

Objectives	21-2
Business Challenge	21-3
Business Solution: Oracle BI Multiuser Development Environment (MUDE)	21-4
Oracle BI Repository Development Process	21-5
SCM Three-Way Merge Process	21-6
Oracle BI Repository Three-Way Merge Process	21-7
Multiuser Development Projects	21-8
Overview: Oracle BI Multiuser Development	21-9
BISAMPLE Example	21-10
Steps to Set Up an Oracle BI MUDE	21-11
1. Create Projects	21-12
2. Edit Projects	21-13
3. Set Up a Shared Network Directory	21-14
4. Copy the Master Repository to the Shared Directory	21-15
5. Set Up a Pointer to the Multiuser Directory	21-16
Making Changes in an Oracle BI MUDE	21-17
1. Check Out Projects	21-18
2. Administration Tool Tasks During Checkout	21-19
3. Modify Metadata	21-20
4. Multiuser Options During Development	21-21
5. Publish Local Changes to Master Repository	21-22
6. Define Merge Strategy	21-23

- 7. Track Project History 21-24
 - History Menu Options 21-25
 - Deleting History Items 21-26
 - Source Control Management System 21-27
 - MDS XML Repository Storage 21-28
 - Summary 21-29
 - Practice 21-1 Overview: Setting Up a Multiuser Development Environment 21-30
 - Practice 21-2 Overview: Using a Multiuser Development Environment 21-31
 - Quiz 21-33

22 Performing a Patch Merge

- Objectives 22-2
- Patch Merge 22-3
- Creating a Patch 22-4
- Applying a Patch 22-5
- Steps to Perform a Patch Merge 22-6
 - 1. Compare Current and Original Repositories 22-7
 - 2. Equalize Objects 22-8
 - 3. Create a Patch File 22-9
 - 4. Apply the Patch 22-10
 - 5. Make Merge Decisions 22-11
 - 6. Verify Your Work 22-12
- Summary 22-13
- Practice 22-1 Overview: Performing a Patch Merge 22-14
- Quiz 22-16

23 Managing Metadata and Working with Service Instances

- Objectives 23-2
- Singleton Data Dictionary 23-3
- BI Service Instance 23-4
- SDD and Service Instance Directory Structure 23-5
- BI Application Archive (BAR) Files 23-6
- Using BAR Files to Move Between Environments 23-8
- Exporting a Service Instance into a BAR file 23-9
- Example: Exporting a Service Instance into a BAR file 23-11
- Importing a BAR File into a Service Instance 23-12
- Example: Importing a BAR file into a Service Instance 23-14
- Managing Service Instances 23-15
- Quiz 23-16

Summary 23-19

Practice 23-1 Overview: Using a BAR File to Back Up and Restore a
Service Instance 23-20

A Using Administration Tool Utilities

Objectives A-2

Wizards and Utilities A-3

Accessing Wizards and Utilities A-4

Managing Sessions A-5

Querying Repository Metadata A-6

Replacing Columns or Tables A-7

Documenting a Repository A-8

Generating a Metadata Dictionary A-9

Creating an Event Table A-10

Updating the Physical Layer A-11

Removing Unused Physical Objects A-12

Oracle BI Server XML API A-13

Using the Oracle BI Server XML API A-14

Summary A-15

Quiz A-17
