

## Certified Software Tester (CSTE)

Training duration: 5 days.

### Knowledge Category 1 ~ Software Testing Principles and Concepts

Tjku umknn ec ý d p O g O O t O

test cases designed based on techniques such as equivalence partitioning and all-pairs testing are explained in detail.

## Knowledge Category 8 ~ Executing the Tests

Testing should commence when the project commences and conclude when the software is no longer in operation. This category focuses on the many skills needed to execute the tests from Acceptance Testing across the SDLC, Unit, Integration and System testing as well as User
