Objective C

Course Contents:

1. **Introduction**
2. **Programming in Objective-C**
   - Compiling and Running Programs
   - Explanation of Your First Program
   - Displaying the Values of Variables
3. **Classes, Objects, and Methods**
   - What is an Object, Anyway?
   - Instances and Methods
   - An Objective-C Class for Working with Fractions
   - The @Interface Section
   - The @Implementation Section
   - The program Section
   - Accessing Instance Variables and Data Encapsulation
4. **Data Types and Expressions**
   - Data Types and Constants
   - Arithmetic Expressions
   - Assignment Operators
   - A Calculator Class
5. **Program Looping**
   - The for Statement
   - The while Statement
   - The do Statement
   - The break Statement
   - The continue Statement
6. **Making Decisions**
   - The If statement
   - The Switch Statement
   - Boolean Variables
   - The Conditional Operator
7. **More on Classes**
   - Separate Interface and Implementation Files
   - Synthesized Access or Methods
   - Accessing Properties Using the Dot Operator
   - Multiple Arguments to Methods
   - Local Variables
   - The Self Keyword
   - Allocating and Returning Objects from Methods

Objective C

8. Inheritance
- Finding Right Methods
- Extension through Inheritance: Adding New Methods
- Overriding Methods
- Abstract Classes

9. Polymorphism, Dynamic Typing, and Dynamic Binding
- Dynamic Binding and the id Type
- Compile Time Versus Runtime Checking
- The id Data Type and Static Typing

10. More on Variables and Data Types
- Initializing Objects
- Scope Revisited
- Enumerated Data Types
- The typedef Statement
- Data Type Conversions
- Bit Operators

11. Categories and Protocols
- Categories
- Class Extensions
- Protocols and Delegation
- Composite Objects

12. The Preprocessor
- The #define Statement
- The #import Statement
- Conditional Compilation

13. Underlying C Language Features
- Arrays
- Functions
- Blocks
- Structures
- Pointers
- They're Not Objects!
- Miscellaneous Language Features
- How Things Work

14. Numbers, Strings, and Collections
- Number Objects
- String Objects
- Array Objects
- Dictionary Objects
- Set Objects

Objective C

15. Working with Files
- Managing Files and Directions: NSFileManager
- Working with Paths: NSPathUtilities.h
- Basic File Operations: NSFileHandle
- The NSURL Class
- The NSBundle Class

16. Memory Management and Automatic Reference Counting
- Automatic Garbage Collection
- Manual Reference Counting
- The Event Loop and Memory Allocation
- Automatic Reference Counting (ARC)
- Strong Variables
- Weak Variables
- @autoreleasepool Blocks

17. Copying Objects
- The copy and mutableCopy Methods
- Shallow Versus Deep Copying
- Implementing the <NSCopying> Protocol
- Copying Objects in Setter and Getter Methods

18. Archiving
- Archiving with XML Properties Lists
- Archiving with NSKeyedArchiver
- Writing Encoding and Decoding Methods
- Using NSData to Create Custom Archives
- Using the Archives to Copy Objects

19. Introduction to Cocoa and Cocoa Touch
- Framework Layers
- Cocoa Touch

20. Writing iOS Applications
- The iOS SDK
- Your First iPhone Application
- An iPhone Fraction Calculator
